#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ninomiya et al (US 4,719,698).

Ninomiya et al discloses an electric shaver comprising all the elements claimed including, inter alia, a cutting assembly (e.g. at 34); a drive assembly (e.g. 6, 48, 49); a motor (e.g. 6); a replaceable battery supply (7); a transmission assembly (e.g. 48, 49); and a switch with various positions (c. 4, l. 26 - c. 5, l. 16). See Figs. 1-20.

Regarding claims 7-9, the overall device, e.g. the housing and other structural features (not claimed), is readable on the "packaging" limitations. In that regard, Ninomiya et al's lock plate (14) and knob (14a) as they relate to the switch knob (12) are readable on the inhibiting second operating position (claim 7); the fact that the ON position may be continuously maintained reads on claim 8; and the accessible opening is readable on the opening through which the switch (12) extends.

3. In view of the issues noted above, it is believed that the following restriction requirement is necessary due to the fact that there may be serious burden and more complex issues that arise out of the differing subject matter claimed in the claims

Application/Control Number: 10/774,279 Page 3

Art Unit: 3724

originally presented, i.e. an electric shaver versus packaging of an electric shaver. Hopefully, the above will provide a basis for an informed decision in this regard.

## **Election/Restrictions**

- 4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-6, drawn to a portable electric shaver, classified in class 30, subclass 43.92.
  - II. Claims 7-9, drawn to a portable electric shaver disposed in a packaging,classified in class 206, subclass 351.

The inventions are distinct, each from the other because of the following reasons:

- 5. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a dummy display model that does not require a replaceable battery supply. See MPEP § 806.05(d).
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/774,279

Art Unit: 3724

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. A telephone call was made to Patrick R. Roche on February 6, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Page 4

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Conclusion

- 11. Iso et al is cited as pertinent art.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Goodman whose telephone number is (571) 272-4508. The examiner can normally be reached on Monday-Thursday between 7:30 AM to 6:00 PM EST.

Art Unit: 3724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap, can be reached on (571) 272-4514. In lieu of mailing, it is encouraged that all formal responses be faxed to (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).
